

Starting with your Telemedicine Appointment

As a patient of our clinic, we are looking forward to your first Telemedicine visit. You can now use the Telemedicine app to meet with your provider online from the convenience of your own home! The process is simple and can be done by following these four steps:

When you scheduled your visit, a telemedicine appointment was created. A confirmation email is sent to you with a link to the meeting, and your appointment code. The email will look like the email below:

** Note that you can enter the session by simply clicking the included link from a PC, MAC, iOS or Android device. If using a method besides the app, you will need to download a quick plug-in (zoom meeting) for the Telemedicine visit to work correctly.

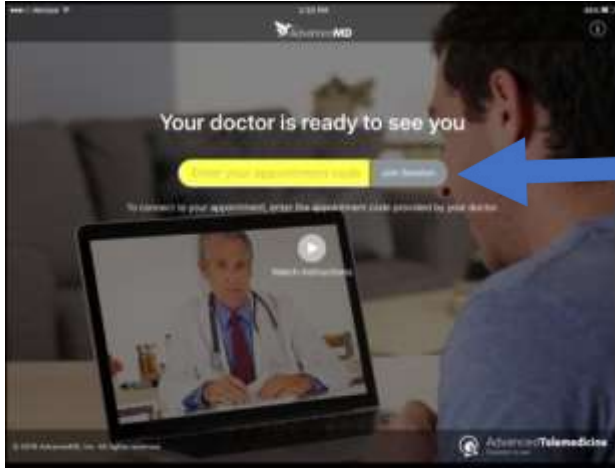

Joining a Telemedicine Appointment

You can join a scheduled telemedicine appointment using an appointment code OR link received in the confirmation email.

1. Open the Telemedicine App on your device OR click the link in the email

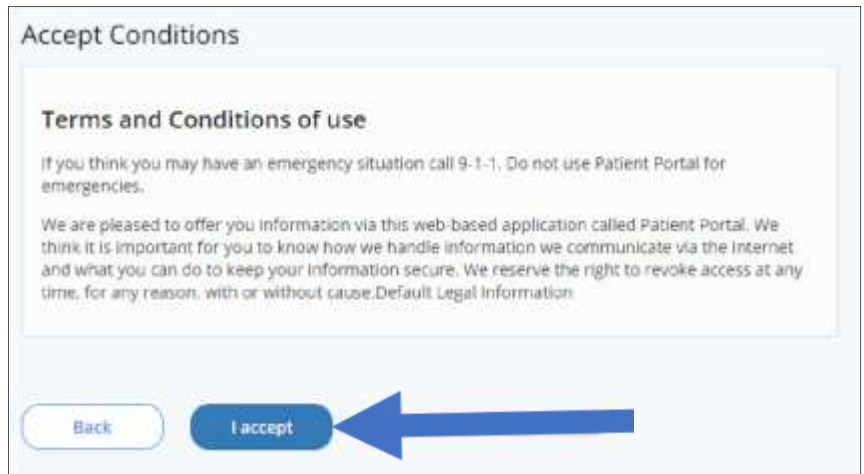

If using the link and logging in for the first time, be sure to allow some extra time to download the plug-ins (Zoom Meeting) needed for Telemedicine. You should only have to download on the first time using the feature.

2. On the main Telemedicine screen, enter the appointment code received in the telemedicine confirmation email. Once a session ID has been added, click “join session”.

Click “Join Session” after the session ID is filled in

3. After entering your appointment code, the Important Information screen opens, where you will need to agree to the conditions before continuing. Selecting Cancel will return you to the Telemedicine screen.

4. Next, you may be directed to the payment screen. Enter your payment information, and then tap Next.
5. You will then enter the waiting room, enter your reason for being seen, and wait for your doctor to arrive.
